Strategic Alliance Magazine

This quarterly magazine reaches a global business readership of more than 2,000 ASAP members and other readers. *Strategic Alliance Magazine* is the only magazine that provides comprehensive coverage of business collaboration and strategic alliance management for both partnering experts and general business readers. Each issue includes:

- One or more “pass-along” feature articles that explain the workings of alliance management and make the profession accessible to more general business audiences
- Articles highlighting cases and lessons learned from leading alliances and collaborations
- Educational pieces intended to discuss and develop the roles, strategies and tactics, skill sets, and other factors that impact how alliance managers do their daily jobs
- Alliance advocacy – articles that examine marketing and other ways of promoting alliances and the alliance management profession both within organizations and across the business world
- Regular features and columns including partnering news; ASAP chapter news and events; a Solutions Marketplace featuring products, services, and other offerings and opportunities for and from strategic alliance professionals; letters from readers; and a closing analysis and opinion piece contributed by a strategic alliance professional.

ASAP at a Glance

Founded in 1998, the **Association of Strategic Alliance Professionals (ASAP)** is a professional association dedicated to the practice of negotiating, planning, and executing strategic alliances and other collaborative business relationships.

ASAP provides knowledge and support for large corporations, midsized enterprises, and small businesses that rely on complex partnerships to achieve core business goals – to penetrate new market segments, fill product gaps, bolster R&D efforts, increase efficiencies, or access technology or expertise. ASAP provides the networking, professional development, and research and resources to alliance professionals at every stage of business collaboration – from partnership formation to the execution of an alliance after a deal is signed all the way through to the termination of a relationship.

Alliance management professionals are responsible for driving an alliance to achieve objectives deemed more difficult to attain independently. They develop and manage an alliance’s governance procedures and coax successful collaboration between sales, business development, R&D, regulatory affairs, and other stakeholders within the company and partner organizations.

ASAP essentially serves the same role for the alliance management profession that other specialty organizations provide for their respective professions.
